

Venice, November 16, 2007

Dear Colleagues,

The International Commission for Electromagnetic Safety (ICEMS) Secretariat recommends you participate in the workshop, entitled, “Foundations of Bioelectromagnetics: **“Towards a New Rationale for Risk Assessment”**” to be held Monday, December 17, 2007. The workshop will be held at the VEGA1 Lybra Palace in Venice, Italy from 9:00 AM to 17:00 PM, organized by ISPESL Dipartimento di Venezia with participation of Ente Zona Industriale di Venezia and many scientists who are engaged in ICEMS.

The workshop offers the occasion to hold a meeting of the members of ICEMS. The state of the art concerning EMF biointeractions will be reviewed and future plans for ICEMS, including research workshops, will be discussed. A session of the Steering Committee of ICEMS will be held the same day at 2:00 p.m. at the same location.

ICEMS includes members who represent scientists from the various disciplines and from many countries of the world. While our progress has been slow, we continue to meet with one another and give public presentations. We will build on these strengths as we make plans going forward.

ICEMS Secretariat hopes you will participate in this important workshop. We welcome your early response to Libby Kelley, ICEMS Managing Secretariat, at [info@icems.eu](mailto:info@icems.eu).

Sincerely,

Libby Kelley  
**Managing Secretariat**
